Contents Volume 26

A robust maximum likelihood method for gravity and magnetic interpretation
J.B.C. Silva and A.O. Cutrim (Pará, Brazil) 1
Densités et anomalies gravimétriques de l'intrusif du Mont Mégantic (Density and gravimetric anomaly data of the Mont Mégantic intrusive)
M.K. Seguin et J. Frydecki (Québec, Canada) 33
Abstracts submitted at the 17th Meeting of the Nordic Association for Applied Geophysics, Uppsala, Sweden, January 11–13, 1989 47
In Memoriam Sture Werner 73
Influence of induced polarization in inductive methods
A.A. Kaufman, S. Geoltrain and R.N. Knoshaug (Golden, Colo., U.S.A.) 75
Modelling of resistivity and IP anomalies of a thin conductor with an integral equation
L. Eskola, H. Soininen and M. Oksama (Espoo, Finland) 95
Migration and the zero-distance phase front
E. Maeland (Bergen, Norway) 105
Application of map analysis techniques for resolution of misties in seismic interpretation
G. Srikanth and M. Rajagopala Rao (Dehradun, India) 119
Radon migration through soil and bedrock
L. Malmqvist, M. Isaksson and K. Kristiansson (Lund, Sweden) 135
Book Reviews
Platinum-Group Element Exploration, by D.L. Buchanan — E.H. Carlson 145
Ore Deposit Models, by R.G. Roberts and P.A. Sheahan (Editors) — B. Öhlander 146
Intermediate-Term Earthquake Prediction, by W.D. Stuart and K. Aki (Editors) — S.J. Duda 148
Some applications of statistical modelling to solve inverse problems in geophysics
J. Batllo (Barcelona, Spain), F. Goltsman, T. Kalinina (Leningrad, U.S.S.R.) and J. Pous (Barcelona, Spain) 153
Band limited ridge regression deconvolution of vibroseis data
T. Matsuoka (Tokyo, Japan), T.J. Ulrych and A.L. Farias (Salvador, Brazil) 161
The use of anomlay offset in solving hidden layer refraction problems
N.P. Merrick (Kensington, N.S.W., Australia) and S.A. Greenhalgh (Bedford Park, S.A. Australia) 181
A multicomponent offset VSP scale model investigation
D.R. Pant and S.A. Greenhalgh (Bedford Park, S.A., Australia) 191
Interpretation of ground VLF-EM data in terms of vertical conductor models
A.K. Sinha (Ottawa, Ont., Canada) 213
Guide for Authors
Approach to gravity estimation of the volume ice fraction in discontinuous permafrost
M.-K. Seguin and J. Frydecki (Québec, Canada) 233
General 2D gravity inversion with density contrast varying with depth
F. Guspi (Rosario, Argentina) 253
Surface electrical resistivity in coastal groundwater exploration
D.W. Urish and R.K. Frohlich (Kingston, R.I., U.S.A.) 267

Application of the Hartley transform to the interpretation of magnetic anomalies due to two-dimensional dyke bodies
I.M. Marobhe (Espoo, Finland) 291
Etude gravimétriques des astroblèmes du Lac à l'Eau Claire, Nouveau-Québec (Gravimetric study of meteoritic craters from Clearwater Lake, New Quebec)
L. Plante, M.-K. Seguin (Québec, Canada) and J. Rondot (Ste-Foy, Canada) 303

Book Review
Mineralization and Shear Zones, by J.T. Bursnall (Editor) — B. Öhlander 325
